Ramadhan Bachtiar/CIFOR

GOOD PEATLAND GOVERNANCE TO STRENGTHEN ECONOMIC, SOCIAL AND ECOSYSTEM RESILIENCE

Despite the growing momentum to mobilize governments, international organizations, and academia in a targeted effort to protect peatlands, there is still a need for more countries to become aware of the importance of action to prevent the loss of peatlands.

Countries urgently need to pay attention to peatlands as a significant source of potential carbon emissions. Indonesia with its massive tropical peatlands will share

concrete experiences in advancing efforts to restore and protect peatlands from loss and degradation with other key tropical peatland countries and other members of the Global Peatlands Initiative (GPI).

The first Global Rapid Response Assessment on Peatlands, a joint effort of the members of the Global Peatlands Initiative to harmonize data for better policy-making, will be launched during the event.

AGENDA Wednesday, 15 Nov 2017
